BETHANY COLLEGE.

Commencement Exercises Yes-terday.

The commencement exercises at this institution are always occasions of a great deal of interest to a great many people, and this year they have been fully up to the average. They may be said to begin on the Sunday preceding Commencement of any, inasmuch as it is usual for the President to deliver on the last Sunday of the collegiate year a parting address—admonitory and exhortatory in its character—to the young men about to close their academic course. The Fuseday of thorse in the scale degree of Science, and the ministerial course. They all made is proper. The specific of the The commencement exercises at this Toesday was found to have been samily decimated by the scythe of the ruth-less destroyer. But four members of the class were present yesterday at the Commencement proceedings, and nine were reported as "dead or missing." The historian of the class, Rev. A. E. Myers, of West Liberty, in this county, gave an interesting biographical sketch of each member, so far as the facts could be ascertained. The honor man of the class was J. C. Palmer, Esq., of Brooke county, who after completing his college course studied law and went West to grow up with the country, but having shook for a few years with the sque at Vincennes, Indiana, and afterwards in Kansas, he returned to his native health and turned his attention to wool growing—an occupation in which he has achieved success and profit. He also practices law to a limited extent, and is known all over Brooke county as a clear headed and intelligent councilor. Owing to an infirmity in his sight, however, he is not able to give the practice the full measure of his attention and only intermingles it with his out door life as farmer and wool grower. Had Mr. Palmer been able to keep straight on in his profession he would have achieved a wide reputation as a "bringy" man. Of him it can be said with considerable certainty, that owing to circumstances which he could not control he was forced to "leave a brilliant career behind him."

Col. Alex. Campbell, of Bethany, was also a member of the class of 52. He is so well known in this region that we need not enlarge upon his reputation as a very prominent and popular member of the Democratic party of West Virginia and as one of the most norpatic business men of Brooke county.

The young men feel that the ogse of the American people are upon them, and that their success is a matter almost involving their future careers. COMMENCEMENT DAY.

THE HONOIS.

There is no class in the college so small that it can not be divided off into at least three degrees of comparison. There is nearly always a first and second honor man, and after them that respectable remainder that receives no honors on Commencement Day, but quite often wins them in the great struggle of life. First honor men at college do not, as a rule, fill the trump of fame in after years. It was remarked to us yesterday that the history of Bethany College is no erception to this rule. We do not, however, make this remark for the encouragement of "bummers" at college, who, while achieving no honors in the course are about as likely to be struck by lightning as to achieve any in after life. But, not to enlarge upon this point, we here put on record that the honor men of the class of 1877, graduating yesterday, were as of 1877, graduating yesterday, were as on record that the honor men of the class of 1877, graduating yesterday, were as follows: In the full course, A. The Inhabitants Homeless, Destitute and Suffering.

Preparations for Their Relief.

B. Warner, at St. Johns, N. B., telegraphs Mayor Ely as follows: "St. Johns is al-most totally destroyed. All the public pulldings are burned, and few business houses are left. Fully one-half of the residences are in ashes. Send all the aid you can. Fifteen thousand people are

says the fire commenced at York Point slip and swept southward through residences to King's street, where it spread and burned all public buildings. The great dread is of starvation, as not a grocery or provision store was left. Fifteen thousand persons are homeless. All business gone. The Mayor has called a public meeting for the relief of the sufferers. They need all the cooked pro-visions and bread they can get. Bosron, June 21 .- A Bangor, Maine

cation with St. Johns direct as yet, The conductor of the express train re-ports that three-quarters of the city is burned and but one building left standing south of King street. A train will leave Bangor to-night with cooked meats for the sufferers. General information places the origin of the fire at the lowe part of the city, on the lumber wineves. The fire, it would seem, spread toward the prison until two o'clock, when it was taken to the Catholic Cemetery. the upper part of the city, raging through Main, Perker and King streets, in which were many of the largest dry goods houses, banks, commission houses and hotels. It is certain that Victoria Hotel, the largest hotel in the province, has been consumed. St. Johns was noted for its dry goods houses and almost all these succumbed to the flames. The following are a few of the principal firms: James Adams & Co., John Armstrong & Co.,

promptly obtained. A prominent Underwriter told a reporter of the Evening Post that he visited St. Johns about year ago. When there he took occasion to examine its Fire Department. As the result of the investigation he has since refused insurance policies on St. Johns property. The force of the department appeared to be strong enough, but the firemen were rarely seen by him in the neighborhood of their stations. The companies were provided with engines, trucks and appliances made in the United States and the alarms were also that of this country, but the engine houses were left in charge of boys and the horses, when not needed at the fire, were emelapsed before a company had answered the alarm. It was not possible this morning to obtain much information about the losses of the various insurance companies, although the loss is undoubted very heavy among some of the foreign companies who have representatives in this city. The officers of the Liverpool, London and Globe Company say they have received no dispatches as yet, and have no idea what the actual loss of the company is, but they knew their risks in St. John's had been curtailed lately, and that their loss would be less than one third of the amount it would have been had the fire occurred a year or so ago.

PORTLAND, June 21 .- A large meeting of citizens was held here to take steps for the immediate relief of the people of St. John's. A considerable sum has beer night with a heavy freight of food for the sufferers.

Prince William street runs from Mar-

ket square to Seed's Point, and the fire seems to have gone in that direction. It was entirely occupied as a business street and was the location of the heaviest trade in the city. Dry goods stores, gro-cery stores, book stores, hardware stores, and in fact almost every class of busines was here represented. Many of the building were very fine, only having been built within a comparatively short time. As this street has been the locality of serious fires which have visited this city in years past have devactated; on it were several banks, the Custom House, new Postoflice, an elegant stone building, completed within the past three years, insurance of fices etc., etc. Many of the old buildings in this vicinity were of sold granite, and very substantial. Sr. John, June 21 .- When the fire had reached Market street, and had obtained a strong hold on many fine buildings situated thereon, several explosions were heard coming from one of the hardware stores. They caused a general scattering of the people, and the report reached as far up as the court house. The fire en-tered King street on the north side from tered King street on the north side from German and Canterbury streets, extending northerly on Charlotte street to the St. John's Hotel, burning Trinity school house in its course, and going up the south side of King street levelled to the ground the Lyceum building and destroyed the marble works of Spotgood, and from there proceeded to Robertson's stable across to St. Malachis Hall, up Lienster street, and then back to King street, and east down nearly to Pitt street. From there all the buildings south of King street have been burned. In the other part of the city the conflagration was stopped about North street, having extended as far up Union as Measrs. J. & S. Robins Bank and the Bank of British North America, which were saved. The police office and station, opposite, were burned. The shipping floated down the harbor to a place of esfety at an early stage of the fire, and there were no losses of shipping by the fire except the schooners in Market Slip.

During the early part of the day the Western Union Telegraph Company's office was burned and its valuable batteries and apparatus destroyed. The office is now established at the railway station; some of its wires are cut off. A great quantity of goods saved fell into the German and Canterbury streets, extend-

The ballast wharf was covered most of the night with people anxious to escape by water, so were the railway track and grounds around the track between the ballast wharf and Courtenay bay.

The Postoflee, in Carloton street, was used last evening for the reception. The evening mails were made up and sent off from there on time. The following newspaper offices were completely swept away: The Ecaning Globe, Freeman, Daily News, Wadelan and Religious Intelligencer. The Globe, Telegraph, News, and the Intelligencer had job offices attached.

The following persons are reported to have lost their lives: Benjamin Williams, Harold Gilbert, Wm. McNeil and Garrett Colter. The mother of ex-Mayor Rokna, his two aunts, and two unknown men were reported run over and killed. Many persons are reported missing. No clear estimate of the value of the property destroyed or the insurance can be given. Certainly \$12,000,000, are gone, and the insurance men think the risks may run up to \$15,000,000.

The officers of the Canadian Insurance Company state that the losses to the company by the St. Johns fire will not exceed
